OBJECTIVE

Motivated CSE graduate (2026) with hands-on experience in full-stack development, AI/ML, and Generative AI — two internships and multiple production-deployed projects. Eager to contribute technical depth and a growth mindset to a forward-thinking team as a Software Developer.

EDUCATION

B.Tech in Computer Science & Engineering
Ramachandra College of Engineering (Autonomous), JNTUK, Kakinada

2022 – 2026
CGPA: 7.8 / 10

INTERNSHIPS

Full Stack Developer Intern (MERN)
SmartBridge / APSCHE • 2 months • 4-member Agile team

May 2025 – Jul 2025

- Built LearnHub, a full-stack e-learning platform, delivering 10+ REST APIs across 3 core modules — Courses, Users, and Content — within a 2-month timeline.
- Implemented JWT authentication and role-based dashboards for student and teacher personas, with NoSQL data modelling in MongoDB.

AI/ML Intern
Edunet Foundation • 2 months

May 2024 – Jun 2024

- Developed an NLP Sentiment Analysis system on 5,000+ restaurant records using Multinomial Naive Bayes, achieving 80% accuracy with Precision, Recall, and F1-Score.
- Engineered features via TF-IDF vectorization, tokenization, and stop-word removal; deployed a Flask REST API for real-time inference with confidence scoring.

PROJECTS

NetflixGPT – AI-Powered Movie Browsing App | Live: [netflix-gpt-gules-tau.vercel.app/browse](#)
React 19, Redux Toolkit, Firebase Auth, Tailwind CSS, TMDB API, OpenRouter API (GPT)

2026

- Integrated GPT-powered natural language movie search via OpenRouter API, converting plain-English queries to TMDB results across Now Playing, Popular, Trending, and Upcoming categories.
- Built Firebase auth with protected routes, auto-playing trailer backgrounds, a Vercel serverless TMDB proxy (token never reaches the browser), and Redux memoization to eliminate redundant API calls.

LearnHub – Full-Stack E-Learning Platform | Live: [learnhub-frontend-r8ay.onrender.com/](#)
React.js, Node.js, Express.js, MongoDB, JWT | Team project (4 members)

Mar – Apr 2025

- Designed and shipped 10+ REST APIs across 3 modules; architected NoSQL schema and role-based access for student and teacher dashboards within a 4-member Agile sprint.
- Delivered JWT authentication, responsive UI, and full deployment on Render within a 2-month Agile timeline.

Toolnify.ai – AI Tools Hub | Live: [toolnify.netlify.app/](#)
React.js, Google Gemini API, Prompt Engineering

Mar – Apr 2025

- Built 5+ AI tools — translation, summarization, email writing, code generation — with secure Gemini API key management and custom prompt pipelines per tool type.
- Architected a React-based single-page app with modular tool components, enabling seamless user experience without page reloads.

Ring2Know – GSM Smart Messaging System
Python, MySQL, PHP, Arduino, GSM Module | 4-member team | Major Project

Nov 2025 – Apr 2026

- Automated school notifications (attendance, fees, academics) via GSM call triggers on an Arduino microcontroller; designed MySQL schema and PHP back-end — no internet required.
- Coordinated hardware-software integration across a 4-member team; presented the working prototype at the college major project showcase.

SKILLS

Languages: Python, C, JavaScript

Web & Backend: React.js, Redux Toolkit, Node.js, Express.js, REST APIs, JWT, HTML, CSS, Tailwind CSS

AI / ML: NLP, Scikit-learn, Google Gemini API, GPT, OpenRouter API, Prompt Engineering

Databases: MongoDB, MySQL

Cloud & Tools: Firebase Auth, Vercel (serverless), Render, Git, GitHub, Postman, VS Code

CS Fundamentals: OOP, Data Structures, Algorithms

CERTIFICATIONS

Data Structures & Algorithms
Generative AI in Software Development
Python Full Course (Beginner to Advanced)
Namaste JavaScript

Amazon via Coursera
Amazon via Coursera
GeeksforGeeks
NamasteDev

ACHIEVEMENTS & ACTIVITIES

- Runner-Up at Mentorly Gen-AI Hackathon 2024 — built and presented a Generative AI web application competing against 30 teams.
- Consistently solved algorithmic problems across competitive coding platforms, strengthening skills in Python, C, and core DSA.
- Completed hands-on AI tools workshops (ChatGPT, Google AI, Generative AI) in 2024.
