PROFESSIONAL SUMMARY

Results-driven CSE graduate specializing in full-stack web development (MERN stack), RESTful API design, and AI/ML integration. Delivered production-ready applications through internships at SmartBridge and Edunet Foundation. Runner-Up at Mentorly Gen-AI Hackathon (2024) among 30 teams. Seeking a challenging role to engineer impactful, scalable software solutions.

EDUCATION

B.Tech in Computer Science & Engineering

2022 – 2026

Ramachandra College of Engineering (Autonomous), JNTUK, Kakinada | CGPA: 7.9 / 10

INTERNSHIP EXPERIENCE

Full Stack Developer Intern (MERN) | SmartBridge / APSCHE

May 2025 – Jul 2025

- Engineered LearnHub, a MERN e-learning platform with JWT auth, role-based dashboards, and 10+ RESTful API endpoints.
- Delivered CRUD functionality for 3 core modules (courses, users, content); shipped deployment-ready app within a 2-month timeline with a 4-member team.

AI/ML Intern | Edunet Foundation

May 2024 – Jun 2024

- Developed an NLP sentiment analysis pipeline using Python, Scikit-learn, and TF-IDF; achieved 80% accuracy on 5,000+ restaurant reviews.
- Executed preprocessing (tokenization, stop-word removal, normalization); deployed a real-time Flask API with confidence score output.

PROJECTS

Thinkboard – MERN Notes App

Nov 2025

Tech: MongoDB, Express.js, React.js, Node.js, Upstash Redis

- Architected a MERN notes app with 8+ RESTful APIs, Redis rate limiting via Upstash (100 req/15 min), and responsive React UI.
- Configured MongoDB NoSQL schema for efficient data modeling; set up deployment-ready backend with environment-based configuration.

LearnHub – Full-Stack E-Learning Platform

Mar 2025 – Apr 2025

Tech: MERN Stack, JWT | Team: 4

- Built a MERN e-learning app with JWT auth, role-based access for 2 user types, 6+ REST APIs, and responsive React UI.
- Adopted modular component architecture; collaborated with 4-member team using Git/GitHub for version control and code review.

Toolnify.ai – AI Tools Hub

Mar 2025 – Apr 2025

Tech: HTML, CSS, JavaScript, Google Gemini API, Prompt Engineering

- Developed a multi-feature AI hub using Google Gemini API across 5+ tools: translation, summarization, email writing, and code generation.
- Optimized prompt engineering for LLM utilities; secured API key storage with auto-removal on browser data clear for user privacy.

Ring2Know – GSM Smart Messaging System (Major Project)

Nov 2025 – Apr 2026

Tech: Python, MySQL, PHP, XAMPP, Arduino, GSM Module | Team: 4

- Architected Python backend for GSM-triggered data retrieval; designed MySQL schema for 3 modules: attendance, fees, and academics.
- Integrated Arduino Mega + GSM module for real-time, internet-free delivery; presented as a college major project showcase.

TECHNICAL SKILLS

Languages & Stack: Python, C, Java, JavaScript, MERN Stack

Frontend / Backend: HTML, CSS, React.js, Node.js, Express.js, REST APIs, JWT, Redis, CORS, Shimmer UI

Database & Tools: MongoDB, MySQL, Git, GitHub, Postman, VS Code, XAMPP

AI / ML: Pandas, NumPy, Scikit-learn, NLTK, Matplotlib

CERTIFICATIONS

- Data Structures & Algorithms — Amazon via Coursera
- Generative AI in Software Development — Amazon via Coursera
- Introduction to Software Development — Amazon via Coursera
- Namaste JavaScript — NamasteDev

ACHIEVEMENTS & ACTIVITIES

- Runner-Up — Mentorly Gen-AI Hackathon (2024): Designed and launched an AI-powered shopping web app among 30 competing teams (4 members each).
- AI Tools Workshops (2024): Completed hands-on workshops on ChatGPT, Generative AI, and Google AI tools.
- Coding Practice: Solved 100+ algorithmic challenges on coding platforms, sharpening DSA skills and logical reasoning.
